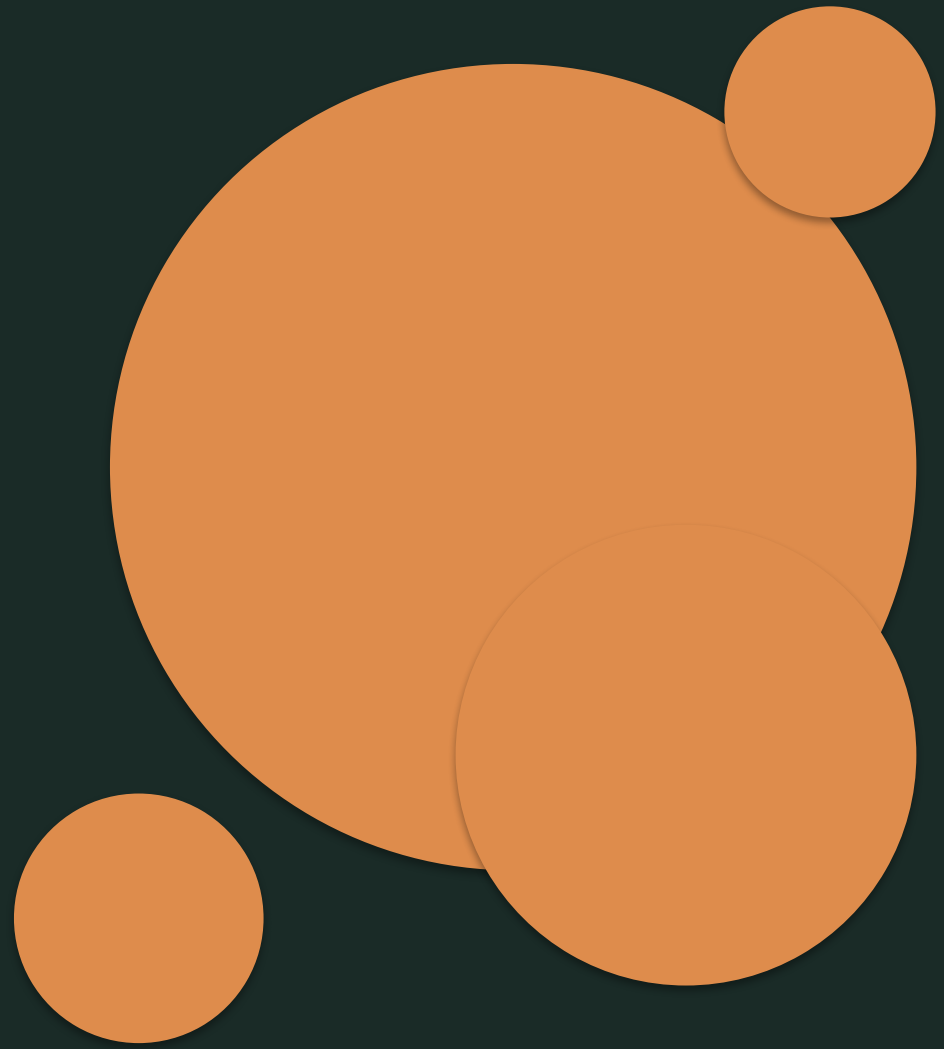
BUNDABERG'S GREATEST MYSTERY

SCHOOL EXCURSIONS 2027

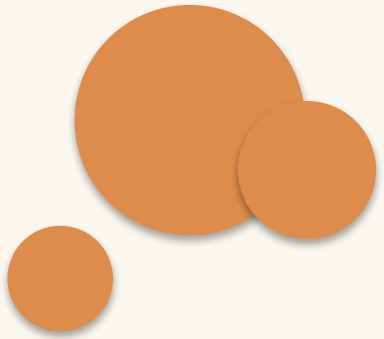
Discover. Question. Explore.



A classroom without walls

An unusual landscape. A real geological question.

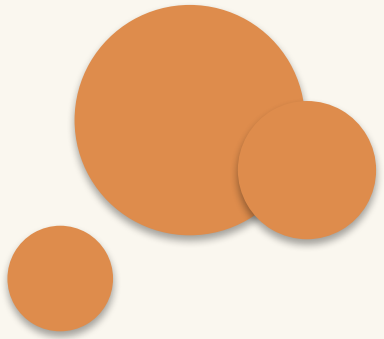
A chance to look closely, think critically and ask: what might have happened here?



35 formations. Countless questions.

At Mystery Craters, students can observe 35 unusual crater-like formations.

Their origins remain a subject of scientific interpretation. We encourage evidence-based questions rather than presenting speculation as fact.



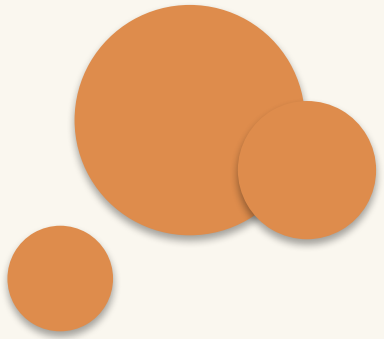
What will students investigate?

OBSERVE — Describe shapes, patterns and differences.

QUESTION — Consider possible natural processes.

COMPARE — Distinguish observations from explanations.

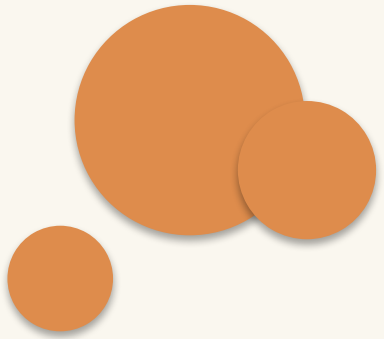
REFLECT — What evidence would help test a hypothesis?



Experience the Earth Room

Discover a collection of rocks, minerals, crystals and fossils.

The Earth Room creates opportunities for close observation, descriptive language, curiosity and discussion about the natural world.



Learning that connects

Science: Earth materials, geological processes and evidence.

Inquiry: asking questions, comparing ideas and evaluating explanations.

Communication: observation notes, group discussion and reflection.

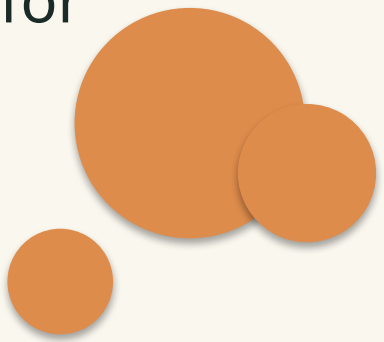
Teachers can discuss age-appropriate learning objectives when enquiring.

An excursion shaped around your class

Tell us your year level, student numbers, preferred date and learning interests.

Ask about available guided or self-guided activities and options for incorporating the Earth Room.

Our team can discuss what suits your group.



Food and refreshments

Students are welcome to bring their own food.

Optional morning tea or afternoon tea may be discussed when you enquire.

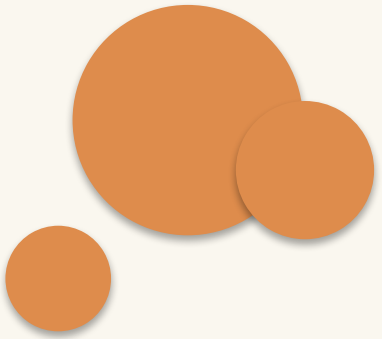
Please ask about catering availability, dietary requirements and group arrangements before your visit.

Plan a comfortable visit

Location: 15 Lines Road, South Kolan, Queensland.

Approximately 25 minutes from Bundaberg.

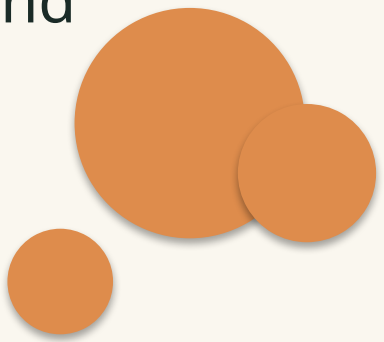
When enquiring, please discuss supervision, accessibility needs, arrival arrangements and the facilities your group requires.



A visit that stays with students

Not every scientific question has a simple answer.

At Mystery Craters, the experience is about curiosity, careful observation and the excitement of exploring what we know — and what we are still trying to understand.



BRING YOUR CLASS TO BUNDABERG'S GREATEST MYSTERY

Enquire about school excursions, group options and optional morning or afternoon tea.
